

# Safe Routes to School National Learning Network

Safe Routes to School policies and programs help get families more active and safe on the trip to and from school and in daily life. The Safe Routes to School National Partnership launched its National Learning Network in 2012 to serve all 50 states through technical assistance, webinars and sharing resources and best practices. The National Learning Network focuses on increasing the number of policies and projects across the country that result in more sidewalks, bikeways and safer street crossings, more physical activity, and increased safety and access for walking and bicycling, especially in lower-income communities. It brings together practitioners, advocates, decision makers and experts to share best practices, model policies and programs, and to share technical assistance resources.

## Webinars

Our free monthly technical assistance webinar series features expert speakers, a chat feature for participants, and archived downloadable post-webinar recordings. The webinars cover advocacy topics such as how to get Safe Routes to School funds awarded and obligated in states, best practices for state Safe Routes to School programs, how to advocate for programs and policies in lower-income communities, and much more. To register and learn more about upcoming topics, visit the webpage listed at the bottom of this page.

## Blog

Our blog includes posts about new research, reports, model policies, and successes in states and local communities around the country on various topics related to Safe Routes to School, including federal funding, Complete Streets, school siting and joint-use agreements, major Safe Routes to School program successes and more. To get to the the blog, just click the link at the bottom of this page.

## Library of Resources

The library of resources contains a table of contents that lists free downloadable documents such as reports, state, regional and local model policies, program and policy success stories, case studies, tip sheets, research, and other informational resources that showcase the best practices and successes of Safe Routes to School, joint-use agreements and related efforts around the country. To get to the library, just click the link at the bottom of this page.

## Technical Assistance

The National Partnership offers fee-based technical assistance to local, regional and state agencies and decision makers on all aspects of Safe Routes to School and related initiatives and policies. Our help can include individualized technical assistance, planning and leading local group workshops, site visits and meetings with local stakeholders. We can also provide inspiring, nationally-known expert speakers for conferences and events. To read more online, just click the link at the bottom of this page.
